

Field Trips

The Board of Education recognizes that a properly planned, well-conducted and carefully supervised field trip with significant value may be an important part of the curriculum of many classrooms.

All field trips shall have the approval of the Superintendent or designee in advance of the trip. Field trips outside the continental United States require approval of the Superintendent or designee.

Consent of each pupil's parent or guardian is required annually in advance of any student participating in a field trip. Parents or guardians will receive notification from the school in advance of all field trips.
