What Happened to the Giant Kangaroo?

- ¹ Australia was once home to a giant kangaroo that had hoof-like toes with claws. As it roamed the forests, it easily reached up into trees and grabbed leaves to eat. Giant kangaroos died off over 40,000 years ago. Why? Little evidence has been found. But **scientists have offered two theories about what killed off the giant kangaroos:**
- ² • Climate change made them extinct. Fossil evidence shows that giant kangaroos struggled through bad droughts. These long periods of time without rain killed off the plants that the kangaroos ate. In between droughts, there were huge floods. Flooding destroyed more of the plants and killed off kangaroos weakened by drought.
- ³ • Humans made them extinct. Fossil evidence also shows that the first humans arrived in Australia about 43,000 years ago. They cleared away forests to plant crops. So giant kangaroos had less and less to eat. Meanwhile, humans hunted and killed them. Before long, giant kangaroos were wiped out.
- ⁴ In 2010, an Australian scientist named Gavin Prideaux argued that both theories could be true: The droughts killed off many kangaroos. Those left were soon killed off by humans. Scientists continue to search for evidence. Maybe they'll finally solve the mystery!

The Donkey and the Salt

- ¹ Long ago, a merchant bought big sacks of salt at the market. He loaded the sacks onto his donkey's back, and the two set off for home.
- ² They came to a stream and began to wade across it. The heavy burden caused the donkey to lose his balance. He slipped and fell into the water. When the donkey stood up again, his load was much lighter. Most of the salt had dissolved in the water.
- ³ The merchant returned to the market and bought salt again. Once again, he loaded the sacks onto the donkey's back. When they came to the stream again, the donkey remembered how to lighten his burden. He purposely fell into the water. The salt melted away, and the donkey rose to his feet without the weight of his load.
- ⁴ The merchant watched with a knowing look. Then he led the donkey back to the market. This time, the merchant did not buy salt. He bought a load of sponges. When the donkey came to the stream, he quickly lay down. The sponges filled with water. Back on his feet, the donkey was surprised to find that his load was much heavier than before.
- ⁵ The moral is *The same trick will not work if it is played too many times.*

Fair Bike Rules

- 1 The city council here in Karlinsburg is going to vote on a new rule: No bicycles on sidewalks. This rule is unfair to youngsters in this community.
- 2 First of all, riding bikes in the street is too dangerous for children. Car drivers may not see a bike in time to stop. The door of a parked car may suddenly open. Bicyclists are injured as a result.
- 3 The sidewalk is safer than the street. Some people have complained about bicyclists on sidewalks. They say that speeding bikes have knocked down pedestrians who cannot get out of the way. But instead of banning bikes on sidewalks, how about making a few simple rules for safe riding?
 - Slow down.
 - Politely ask pedestrians if you can pass them.
 - Walk the bike if the sidewalk is crowded.
 - Stop at every driveway and cross street.
- 4 Sidewalk rules like these can give everyone a safe way to get around. When a Karlinsburg youngster learns to ride a bike, these rules can be part of the training. Please let council members know that they should vote for safe riding on sidewalks, not for banning bicycles.
