

We need your help recording the weather each day this week! Visit www.weather.com or any weather app you have access to at home, look at the paper, or watch a TV weather forecast. Fill in each column carefully. Notice that the temperatures need to be recorded for both a.m. (morning) and p.m. (evening). Temperatures should be recorded in "degrees Fahrenheit" (°F). On Friday, take a look at your completed chart and write down observations that you noticed. There are questions and sentence starters to help with your thinking!

Date	Draw Today's Weather Icon (Sunny, Partly Sunny, Rainy, Stormy, etc.)	Temperature a.m. (Morning)	Temperature p.m. (Evening)	Precipitation (none, rain, snow, hail, or sleet)	Wind Speed and Direction (How fast is it going? What direction is it blowing?)
Example: Friday, May 1 st		33°F	57°F	Rain	North, 5 MPH
Monday, May 4 th					
Tuesday, May 5 th					
Wednesday, May 6 th					
Thursday, May 7 th					
Friday, May 8 th					

My Weather Observations

- What patterns do you notice in your weather log?

- Which day was the warmest? Which day was the coldest?

- Which day was the wind the strongest? Which day was the wind the weakest?

- How many days had rain? How many days had snow? How many days didn't have precipitation?

- What surprised you the most?

I was surprised that...

- What are you wondering?

I'm wondering...
