

REQUEST FOR PROPOSAL (RFP)

[RFP#122024-INTERNETACCESS&TRANSPORT-1151WHITEST]

DECEMBER 2024

WARNING:

Read this document carefully. Do not assume that it is the same as other similar posted documents you may have seen from the Dubuque Community School District.

1.0 Intent.

NOTICE IS HEREBY GIVEN that the Dubuque Community School District (hereinafter referred to as “District”) acting by and through its Board of Education, is seeking competitive, sealed proposals from qualified Bidders for symmetrical Internet access bundled with a transport service as a one year or multi-year contract beginning July 1, 2025.

1.1 District Profile.

The District reorganized in the early 1960's with the surrounding rural area and now serves a population of over 70,000. The geographical area the District serves is over 245 square miles. The District operates twelve elementary schools, three middle schools, two high schools, a 6-12 online school, an alternative learning campus, and a preschool center.

The District has a current enrollment of approximately 9,863 students, as reported as the district’s certified enrollment to the Iowa Department of Education in the fall of 2024.

1.2 Scope of Products and/or Services.

Symmetrical Internet access bundled with a transport service is when the provider provides both Internet bandwidth and the physical transport circuit (which could be fiber-only networks, fiber/non-fiber hybrid networks, or non-fiber networks such as cable, DSL, copper, satellite, or microwave) over which the Internet access is delivered.

This symmetrical Internet access bundled with a transport service from qualified Bidders will be installed (if applicable) and handed off to the District’s head-end located at:

Prescott Elementary School
1151 White St.
Dubuque, IA 52001

The minimum bandwidth level, with guaranteed throughput, the District seeks is 2 Gbps, but will entertain increments available from the service provider, up to and including, 10 Gbps.

Accompanying this bundled Internet Access service, the District requires, at a minimum, a routable /28 subnet comprising of fourteen (14) dedicated and reserved IPv4 addresses. The Bidder may also provide optional pricing, if applicable, for the technical equivalent number of IPv6 addresses.

Additionally, the Bidder, as the Internet Service Provider (ISP), must support Border Gateway Protocol (BGP) peering to facilitate dynamic route exchange between the ISP's network and the District's autonomous system (AS). The ISP should be able to configure and maintain a BGP session with the District's AS, providing full routing table support and/or partial route announcements as required.

The District will consider a contract length of one (1) year or three (3) years. For a three (3) contract length, an option of extending the contract with two (2) – one (1) year term contracts for a total of five (5) years. Cutover to any new contracted services will occur by June 30, 2025, and the billing for new contracted services will start on July 1, 2025. Note that District is a tax-exempt public-school system.

*****IMPORTANT*****

Bidders are required to clearly identify ineligible equipment and services and provide cost allocations for equipment and services that are partially or conditionally eligible in accordance with Universal Service Administrative Company (USAC) E-Rate program rules.

1.3 Specifications and Quantities.

The proposal must include any service provider-owned onsite equipment or services performed necessary to hand off service to the District's head-end equipment, and also describe the proposed hand-off as part of the response. Any conduit or trenching from the street to the hand-off must include replacement of conduit, pavement, and returning any disturbed ground to its original condition, as determined by the District. Any new construction and the pathways used by the service provider within district grounds shall be pre-approved by District authorized, officials prior to starting construction.

Installation costs should consider for any afterhours work. The District will make no additional compensation to the selected vendor for these after-hour services.

***Transition Plan** - As the cut-over date for any new provider is required to be on July 1, 2025, the District requires a transition plan to be provided with any proposal response from responsible suppliers that are not the current carrier. The plan is to include the resources to be dedicated to the transition, all costs associated with the transition, a timeline of actions with a completion target date for the supplier and for the District transition team. The transition plan is to outline*

the expectations the supplier team would have of the District and the information or task the District is to provide the supplier and the date any information or task would be required.

Each Bidder must provide a proposed Service Level Agreement (SLA) with their response. The proposed SLA must include a description of the services provided, and where applicable, describe how these services will be measured.

At a minimum, the SLA should describe that the vendor will make all reasonable efforts to ensure 99.99% network availability of each circuit, and it should provide frame/packet loss, network latency, and network jitter commitments.

Each SLA should describe 24x7x365 trouble-reporting procedures, offer commitments with regard to the time to repair outages, and describe provisions offered in the event of chronic trouble. The services described in the SLA shall be maintained to the specifications of these commitments throughout the term of the contract, and the selected vendor shall remediate any deficiencies at no cost to the District. Additional features, such as resiliency, basic firewall service, and DDoS protection, should also be described.

To ensure independent redundancy, it is the preference of the District that a sole Bidder is not used to provide connectivity for the District's primary and secondary connections. If bidding on both the primary and secondary connections for the District, it is incumbent on the Bidder to provide evidence of either separate connectivity pathways to ensure redundancy OR evidence to support that there is independent redundancy of their connectivity.

All bidders must, at a minimum, specify the number of hops in their connectivity paths to demonstrate how the District's traffic is routed out of the Dubuque metropolitan area. Additionally, bidders must provide details of the physical and logical pathways for the proposed connection, including whether the physical infrastructure is owned, leased, or shared with third parties. Bidders must also include their Autonomous System (AS) number(s) used for routing traffic on the internet.

All quantities solicited in this request for proposal are a minimum; however, the District reserves the right to increase or decrease the quantities that is most beneficial to the interests of the District.
